

GAF

TimberSteel™

Premium Metal Roofing System

Introducing the future of metal roofing

Color shown: Obsidian Black

Get a tough metal
roof that's not as
tough on your budget

The TimberSteel™ Premium Metal Roofing System from GAF is easy to install and easy on your budget.

GAF

We protect what matters most™

Beauty. Longevity. Affordability.

The **NEW GAF TimberSteel™ Premium Metal Roofing System** offers all the toughness, beauty, and longevity you want from a metal roof. It's easy and fast to install, and makes choosing a metal roof more practical than ever.

Featuring **GALVALUME®** steel with an embossed vertical grain, the GAF TimberSteel™ Premium Metal Roofing System is available in a variety of colors to suit your home and taste.

Note: Due to the effect natural lighting conditions have on the color and texture of this product (as well as the limitations of the commercial printing process), the appearance of your TimberSteel™ roof may vary from the photos depicted in this brochure. It is not uncommon for the appearance to vary considerably throughout the day as the sun moves across the sky. Always view an actual product sample before making a color decision and/or installing on the roof.

¹ Available on qualifying installations installed by GAF Master Elite® Roofing Contractors. See TimberSteel™ ArmorPledge™ Limited Warranty for complete coverage and restrictions.

It's never just about the roof — it's about what matters to you

Your home is an extension of you. It tells people who you are, and what you care about. Choosing a GAF roof says you care about shelter and security. Choosing a **GAF TimberSteel™ Metal Roofing System** says you also have a vision for your home and for the environment. Steel is one of the most recyclable materials available, so many decades from now, when your home gets another new roof, this one can get a new useful life instead of getting carted to a landfill.
